FIRE PROTECTION SYSTEMS

FIRE ALARM SYSTEMS

ProtechFire provides comprehensive fire alarm systems that alert individuals to emergencies such as smoke, fire, carbon monoxide, or other hazards. These systems include automatic activation through smoke or heat detectors and manual activation devices like call points or pull stations. The alarms range from motorized bells to wall-mounted sounders and horns.

FIRE FIGHTING SYSTEM

ProtechFire provides fire fighting systems tailored for high-rise buildings, schools, hospitals, malls, warehouses, and more. Our solutions include fire extinguishers, hose reels, monitors, nozzles, sprinkler systems, and hydrants.

EMERGENCY LIGHTING SYSTEM

Our emergency and exit lighting systems illuminate paths to safety during power outages, ensuring safe and efficient evacuation.

SPRINKLER SYSTEM

ProtechFire installs state-of-the-art fire sprinkler systems for both commercial and residential buildings. Our systems are highly effective, with 96% of fires in protected buildings being controlled solely by the sprinklers.

FIRE EXTINGUISHER

FIRE SUPPRESSION AND FM200 SYSTEM

ProtechFire specializes in installing fire suppression systems and offers annual maintenance contracts across the UAE. Our systems are designed to extinguish or control fires in various settings, ensuring comprehensive safety. ProtechFire provides FM200- clean agent fire suppression systems for Class A, B, and C fires. These non-toxic systems leave no residue, making them ideal for protecting high-value assets and occupied spaces.

KITCHEN HOOD SYSTEM

ProtechFire installs kitchen fire suppression systems designed to contain fires in commercial kitchens. These systems discharge wet chemicals that effectively starve the fire and protect appliances.

CENTRAL BATTERY SYSTEM

EMERGENCY EXIT LIGHT

Our emergency and exit lighting systems illuminate paths to safety during power outages, ensuring safe and efficient evacuation.

SIRA CCTV SYSTEMS

SIRA APPROVED CAMERA SYSTEM:

A SIRA-approved camera system ensures compliance with the Security Industry Regulatory Authority's standards, offering high-quality surveillance for enhanced security in various environments.

CCTV AMC:

A CCTV Annual Maintenance Contract (AMC) provides ongoing support and maintenance services to ensure the optimal performance and longevity of surveillance systems.

ACCESS CONTROL SYSTEMS:

These systems regulate and monitor access to restricted areas by using methods like keycards, biometric scans, or PINs to ensure only authorized individuals can enter.

STRUCTURED CABLING:

Structured cabling provides a standardized system for managing cables and network connections, ensuring efficient data transmission and future scalability for communication systems.

ANPR AUTOMATIC NUMBER PLATE CAMERA SYSTEMS

ANPR technology automatically captures and reads vehicle number plates, enhancing security by enabling real-time tracking and monitoring of vehicles in secure areas.

PUBLIC ADDRESS SYSTEMS

A public address system amplifies audio to make announcements or deliver information to large groups in public or private spaces.

AUDIO & VIDEO INTERCOM SYSTEMS

This system enables two-way communication with both audio and video capabilities, enhancing security and communication at entry points or within buildings.

PARKING MANAGEMENT SYSTEMS

This system efficiently manages parking spaces, guiding drivers to available spots, reducing congestion, and streamlining parking operations.

SMATV SOLUTIONS

SMATV (Satellite Master Antenna Television) systems provide centralized distribution of satellite TV signals to multiple users within residential or commercial buildings.

TURNSTILE SOLUTIONS

Turnstile systems control pedestrian access to secure areas by allowing only authorized individuals to pass through while preventing unauthorized entry.

GATE BARRIER SYSTEMS

Gate barrier systems control vehicle access to secure locations, providing automated and secure entry and exit points for vehicles.
